

Stew Crew Volunteering Update: July 2020

Timmer's Field (North)

Removal of Thistle in the prairie at Timmer's Field North exposed wonderful wildflowers and fruit trees.

Thoma Prairie

Created a staked perimeter to protect the young hardwood trees. Some of this prairie wants to be a hardwood forest!

Thoma Prairie

Removed the boxelder trees to allow the young hardwoods to thrive. We learned how to identify boxelders as they have compound leaves and thick twigs that transform from powder blue to purple-green as the season progresses.
